

Spiral Rivals

Elevator Pitch

Navigate intertwined spirals, strategically race to your opponent's base, and collect tokens in Spiral Rivals, a two-player board game filled with dice-rolling, strategic movement, and unexpected twists.

Story

In a realm where spirals entwine, two rivals embark on a quest to reach the heart of the spirals and claim the keys to their opponent's base. As competitors traverse the spirals, their destinies intertwine in the center, where two tokens serve as the keys. The player who collects a token marks their journey to the opponent's base. In Spiral Rivals, the keys to victory lie in the elusive tokens at the center - collecting one is not just strategic; it's mandatory for triumph!

Instructions

Objective

Be the first to reach your opponent's base by navigating through the spirals, collecting a token at the center to signify your journey, and using strategic spots to your advantage.

Setup

Place the board with the spirals facing up.

Each player starts at their designated base on opposite ends of the board.

Place two tokens at the center.

Gameplay

Throw the dice to decide who plays first.

Players take turns rolling the dice and moving their pieces along the spirals.

The spirals lead to the center, where two tokens await. Upon reaching the center, collecting a token is mandatory to mark your journey. Pick up the token in a shape corresponding to the opponent's base to unlock it and win.

Collecting a token wins you an extra dice throw.

From the center, continue along the opponent's spiral to reach their base.

When both players land on the same spot, they have the option to choose whether to initiate a dice duel. If one player rolls a higher number, they successfully keep their token while the other one loses it. In the case of a tie or if the duel is not initiated, both players retain their tokens.

Be patient when nearing the center or opponent's base; you need to wait for the exact number on the dice to move to that spot.

Special Spots

Swap: Swap places with your opponent. Be careful what path you should follow.

Teleport: Decide whether to roll the dice; teleport to the inner/outer circle on 1 or 2 or move the opponent forward on 3-6 by the exact number on the dice.

Winning

The first player to reach their opponent's base after collecting a token from the center wins Spiral Rivals. Collecting and retaining a token is mandatory for victory, symbolizing a successful journey through the spirals.

SPIRAL RIVALS

SPIRAL RIVALS

Note

In Spiral Rivals, players utilize pieces, tokens, and dice to navigate the board, and unique shapes for tokens and on the bases were introduced after playtesting for enhanced clarity: distinct token shapes aid easy identification, while symbols drawn on bases create an intuitive association, streamlining gameplay and minimizing confusion. In addition, besides teleporting, players also strategically decide whether to initiate a dice duel when landing on the same spot, adding depth and strategic options to enhance the overall game experience.
